

transcription factor binding

mitotic sister chromatid segregation

sister chromatid segregation

nuclear chromosome segregation

chromosome segregation

negative regulation of cell cycle process

cell periphery

chromosomal region

cell cycle checkpoint signaling

negative regulation of cell cycle phase transition

chromosome, centromeric region

cell adhesion

DNA repair

chromosome organization

DNA replication

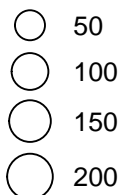

double-strand break repair via homologous recombination

nuclear chromosome double-strand break repair

DNA-templated DNA replication

recombinational repair

number of genes

p.adjust
